## Deutsche Bahn AG

### Update to credit analysis

#### Summary

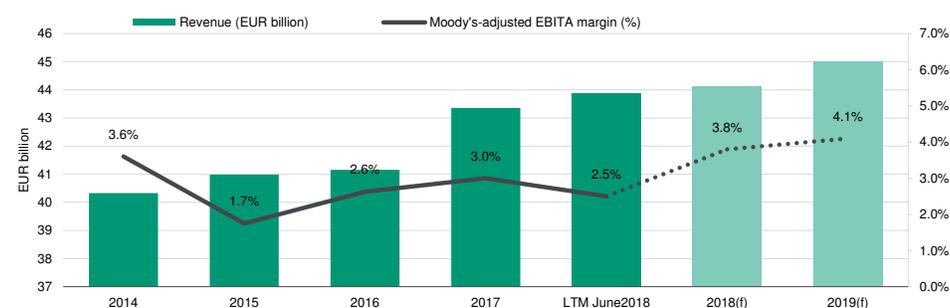

[Deutsche Bahn AG's](#) (DB) Aa1 issuer rating incorporates a three-notch uplift from its a1 Baseline Credit Assessment (BCA), reflecting the relationship between the company and the [Government of Germany](#) (Aaa stable).

The a1 BCA is weakly positioned, owing to a number of challenges, particularly in terms of profitability, leverage and free cash flow (FCF) generation, which reflect the increasing competition in both the cargo and passenger businesses. DB's management has started a restructuring programme to reduce costs and improve service quality, entailing substantial investments (in excess of €4 billion in annual net capital spending) through 2021. We expect this large capital spending to strain DB's FCF, which we estimate will remain negative (around €1 billion deficit) in the next 12-18 months, and bring leverage to 5.5x through 2019, a level that is still high for the current BCA.

DB's BCA is supported by the company's size, geographical diversification and leading global market position, as well as the predictability of the legal framework for railway companies in Germany and the stable environment in which the company operates in its domestic market.

#### Exhibit 1

#### Low profit margin remains the main credit challenge Moody's-adjusted revenue (€ billion) and EBITA margin (%)

All figures and ratios are calculated using Moody's estimates and standard adjustments. Moody's Forecasts (f) are Moody's opinion and do not represent the views of the issuer. Periods are fiscal year-end unless indicated otherwise. LTM = Last 12 months ended 30 June 2018.

Source: Moody's Financial Metrics™

#### Credit strengths

- » Solid business profile, supported by a predictable operating environment
- » No changes expected in our assumptions of government support and default dependence

## Credit challenges

- » Continued pressure on profitability
- » FCF generation strained because of an intense capital spending programme

## Rating outlook

The stable outlook on DB's rating is in line with the stable outlook on the Aaa rating of its support provider, the German government. This reflects the fact that any significant adjustment in the rating of the German government would cause us to reassess the amount of credit uplift incorporated in DB's rating. In addition, a further weakening in DB's BCA could exert negative pressure on the company's Aa1 rating.

## Factors that could lead to an upgrade

DB's rating is one notch lower than the sovereign rating and we expect this gap to remain because we do not expect any strengthening in government support beyond the current high level, nor do we expect any change in our dependence assumption.

The BCA would most likely come under upward pressure from an improvement in:

- » DB's operating performance, with the Moody's-adjusted EBITA margin exceeding 6% on a sustained basis
- » Moody's-adjusted debt/EBITDA well below 5.0x on a sustained basis

## Factors that could lead to a downgrade

DB's Aa1 issuer rating is sensitive to any weakening in the likelihood of support from the federal government, which we expect to remain high, given the constitutional framework and the importance of DB to the economy.

In addition, any further weakening in the BCA could result in a downgrade of the Aa1 rating. This weakening could be caused by the following:

- » A permanent deterioration in the company's operating performance, with the Moody's-adjusted EBITA margin remaining below 4.5%
- » Moody's-adjusted debt/EBITDA remaining above 5.5x
- » Weakness in the company's business profile, resulting from a change in its integrated business model with a separation from infrastructure management activities
- » A major decline in ongoing infrastructure subsidies, increasing the burden of infrastructure capital spending for the company

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on [www.moody's.com](http://www.moody's.com) for the most updated credit rating action information and rating history.

## Profile

Deutsche Bahn AG (DB) is a vertically integrated rail and logistics group that owns and operates the German national rail transportation network. DB is one of the largest rail and logistics companies in the world. In 2017, DB generated €42.7 billion of revenue and €4.5 billion of reported EBITDA. The company includes rail track infrastructure, and passenger and freight transportation services under its holding umbrella. DB holds leading market positions in most of the segments in which it operates. These segments include long-distance (10% of revenue) and regional (20%) passenger railways in Germany; mass-transit transportation services through the subsidiaries DB Arriva (13%) and DB Cargo (10%); logistic services through the subsidiary DB Schenker (38%); and railway stations and infrastructure management (8%).

Exhibit 4

### Revenue breakdown by region 2017

External revenue.

Source: Company report

## Detailed credit considerations

### Low profitability will remain a key credit concern

DB's weak profitability remains our main credit concern because we expect the company's EBITA margin (on a Moody's-adjusted basis) to remain between 3% and 4% through 2018, which we consider low for the current BCA. Besides restrictions in rail operations, in recent years, DB's profitability has been hurt by (1) weak performance in the rail freight division (DB Cargo); and (2) increasing competition, particularly in the regional rail services business, with some of DB's existing contracts awarded to competitors, which exerted significant pressure on prices and volume.

We expect DB's profitability to remain subdued in the next 12-18 months, mainly as a result of continued prices and traffic growth and inflationary pressure on the cost structure.

DB's management is implementing a restructuring programme to address weaknesses in operating performance via service improvements, cost-saving initiatives. However, the improving profitability trend started in 2015 was partially reversed in the first half (H1) 2018 as operating costs increased faster than revenues. Profitability, as measured by Moody's-adjusted EBITA margin decreased to 2.5% in the last twelve months(LTM) to June 2018, from 3% in 2017. The decline is attributed to higher personnel costs, increasing energy costs, digitalisation costs. Revenues in H1 2018 increased by 2.3% compared to H1 2017 supported by favourable macroeconomic conditions which resulted in (1) an increase in the number of passengers and volumes sold mainly in Germany; and (2) a recovery in world trade, with a significant increase in both ocean and air freight volumes. This growth was partially offset by negative FX developments, mainly for DB Arriva, operational restrictions in some European countries and the decline in the cargo business, mainly in Germany. Cargo traffic reduction was affected by the difficulties in the domestic automotive industry and the closure of coal-fired plants across the country.

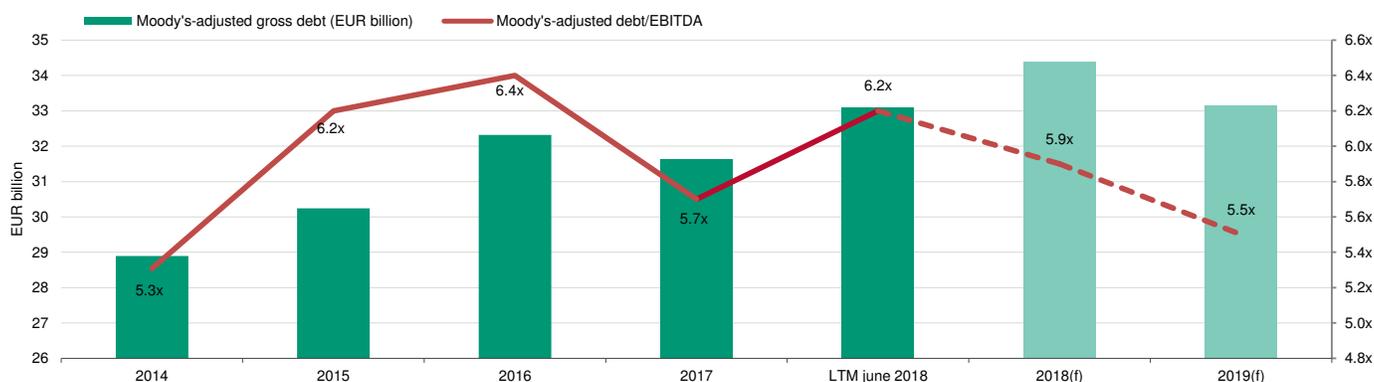

### High and increasing capital spending will keep leverage high for the BCA and FCF under strain

We expect DB to maintain leverage (measured as Moody's-adjusted gross debt/EBITDA) around 5.5x over the next 12-18 months, down from 6.2x in the LTM to June 2018, which is still high for the current BCA. We expect reported net debt to marginally increase to around €20 billion by year-end 2019 from €18.6 as of year-end 2017 as a result of the company's ongoing dividend payments and the expected higher capital spending requirements above €4 billion annually, on average, in 2018-21. Similarly, this large capital spending will strain the company's FCF, which we estimate will remain negative (around €1 billion deficit) through the forecast period.

Exhibit 5

#### Leverage will remain high for the BCA

##### Moody's-adjusted gross debt (€ billion) and debt/EBITDA

All figures and ratios are calculated using Moody's estimates and standard adjustments. Moody's Forecasts (f) are Moody's opinion and do not represent the views of the issuer. Periods are fiscal year end unless indicated. LTM = Last 12 months ended 30 June 2018.

Source: Moody's Financial Metrics™

More positively, the decision of the federal government to provide a support package totalling more than €2.7 billion over 2017-21, of which €1.7 billion has been completed, will ease some pressure on DB's financial leverage in the coming years. These decisions also mitigate the credit-negative announcement made by DB's management that the possible partial privatisation plans of DB's subsidiaries, DB Arriva (passenger transport services outside Germany) and DB Schenker (logistics services) or both — aimed at containing the company's increasing debt load — have been put on hold.

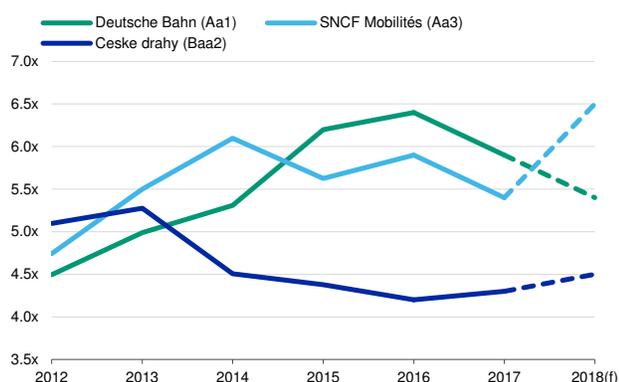

### Integration with infrastructure is credit positive

DB's weak leverage and FCF coverage are largely driven by the company's vertically integrated business model and substantial investment needs in rail track infrastructure. This set-up is unusual in the European rail operators market, where the infrastructure and rail operating businesses are mostly managed and run separately. We believe that the combination of the two businesses provides DB with an advantage, given the breadth of its operations. Therefore, DB can accommodate higher leverage in the a1 category than other rail operators. For example, in France, the railway operator [SNCF Mobilités](#) (BCA: baa1 and long-term rating: Aa3 stable) has a similar leverage level (5.7x Moody's-adjusted debt/EBITDA in the 12 months ended June 2018), while the infrastructure manager [SNCF Réseau](#) (Aa2 positive) has leverage in excess of 30x.

Exhibit 6

#### DB's leverage is one of the highest among its European peers and will remain elevated

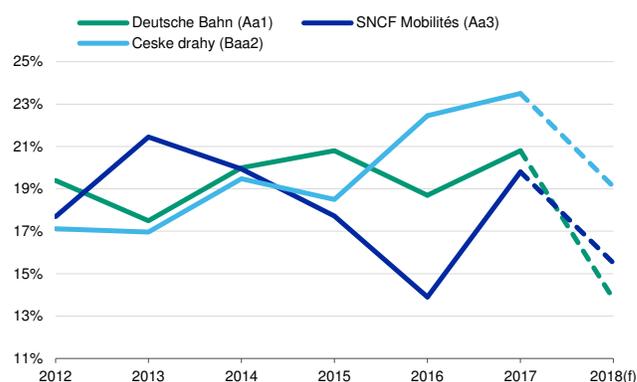

Moody's-adjusted debt/EBITDA

### Solid business profile, supported by a predictable operating environment

We consider DB's operating environment in Germany to be stable and supportive of the company's credit quality. Germany has set the pace for rail sector liberalisation. For this purpose, the government has put in place a stable legal framework, entailing (1) the government's constitutional obligation to provide functional rail infrastructure, implying that it will sustain most of the investments in infrastructure; (2) budgeting of funds in the medium-term planning process for regional transportation; and (3) the existence of a service and financing agreement between DB and the federal government, with well-defined quality levels.

As a result of the opening of the German rail sector to competition, DB's market shares in both passenger transport and rail freight have been declining gradually. However, this decline has been 1%-2% per year (based on our analysis and external market research) and, in the passenger segment, has been offset by an increase in the absolute number of passengers, and is, therefore, manageable. Moreover, DB's business profile is supported by its large size and broad diversification by both business segment (rail and bus passenger transport, rail freight, logistics and rail infrastructure) and geography (around 43% of revenue in 2017 was generated abroad, including 31% in Europe (excluding Germany), 7% in Asia-Pacific and 4% in North America, mainly in the cargo and logistics businesses, and from DB Arriva).

DB's business profile is also underpinned by its leading market positions. DB is the market leader in the European rail freight business and is the second-largest passenger railway operator after SNCF Mobilités. In addition, DB is one of the leading groups in European land transport, air freight, ocean freight and contract logistics.

### No changes expected to our assumptions of government support and default dependence

Given DB's 100% ownership by the German government, we apply our Government-Related Issuers rating methodology for the company. Therefore, DB's rating reflects a combination of the following inputs:

- » A BCA of a1
- » The Aaa domestic-currency rating of the Federal Republic of Germany
- » The high default dependence between DB and the government
- » The high probability of support from the government

Our assessment of a high default dependence between DB and the German government reflects (1) Germany's status as a key hub of European rail traffic, and (2) the strong integration of railway infrastructure into the international economy and trade flow. These factors are balanced by (1) DB's geographical diversification, mainly via its international logistics and freight-forwarding activities; and (2) the increasing presence of the company's rail freight activities in neighbouring European rail markets.

Our expectation that the government will provide DB with a high level of support in case of need is based on (1) the constitutional requirement that the government remains the owner of rail infrastructure in the country and is responsible for ensuring that it is functional; (2) DB's 100% state ownership; (3) the strategic importance of functioning, well-funded rail infrastructure for Germany's economy; (4) an overall strong political consensus regarding the public role of DB and the importance of its activities for the German economy; and (5) DB's dominant role as a regional transport provider, in addition to its de facto monopoly in the long-distance passenger rail segment.

### Liquidity analysis

We expect DB to maintain satisfactory liquidity over the next 12 months, supported by (1) its cash position of €3.7 billion as of June 2018, (2) its fully available €2 billion commercial paper programme, (3) €2 billion of unused committed credit lines, and (4) its sizeable cash flow from operations, which we forecast to be €3.8 billion in 2018. Major cash needs include high capital spending, which we estimate at about €4.5 billion in 2018, net of grants from the German government and around €1.5 billion in debt maturities in the next 12 months (until June 30, 2019).

We also expect DB to maintain its excellent access to the capital markets. In addition, our liquidity assessment assumes that, in case of need, the company would receive support from the federal government, which would provide timely cash injections. These liquidity injections would go beyond the government's statutory duty to preserve DB's operations from insolvency.

## Rating methodology and scorecard

DB's BCA of a1 is one notch higher than the grid-indicated outcome of our Global Passenger Railway Companies rating methodology, published in June 2017. The one-notch differential reflects our view that DB can accommodate higher leverage in the a1 category than other rail operators, owing to its integrated business model, with the railways network and rail operations under one roof.

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJJK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJJK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJJK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJJK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJJK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJJK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJJK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
